Hi Raji,

We don't have shape files for the topo, but attached is the drawing file and a PDF of the topo survey. I have also attached a revised GIS packet with the source area and drainage area soil boring locations broken out. Let us know if you need anything else.

Thanks,

Roberta

Raji - Roberta will send you the files later this afternoon.
Roberta - please call me when you get back to the office. I'll explain.
Matt

Matt

See request from our contractor below. Please see if you or someone else from PBW can provide these. Thanks.

Subject: U.S. Oil Recovery Project - Request for Additional GIS Files (Task Order 144)

Hi Raji,

After our conference call yesterday, Ned checked the current GIS files we have and identified some additional information we would like to request if possible. There are proposed soil boring locations in the drainage areas. That information is either a separate shapefile (.shp) from the proposed soil boring location shapefile that we have, or it is the same shapefile with an attribute column added for drainage area vs. source area. Would it be possible to obtain this information or clarification from PBW? Also, PRPs plan identified that they intended to do an evaluation of site topography. We do not have a detailed topographic map for the site, so may we please request either the detailed topo or the results of the PRP Group's evaluation? This will assist in determining the best locations for split samples.

Sincerely,

April
